

Work hygienically – clean economically.
Innovative complete solutions from one source.

Countless cleaning tasks. One system.

The name Kärcher stands for performance, quality and innovation. And for cleaning expertise that sets standards. As the inventor of high-pressure cleaning Kärcher is the world leader in the market today and one of the driving forces behind technological progress in this and other fields. As an industrial provider specialised in the field of food processing, Kärcher provides technically and economically optimal solutions for every field of production as well as offices and outdoor facilities. From standard units to complete customised solutions. From consulting and planning to initial start-up and full service. Expect more of Kärcher and you will get it. Higher performance. More orientation toward the future. More sustainability. More partnership. Partner with Kärcher and you will see the difference. Kärcher makes a difference.

1 Dry cleaning

Remove dry dirt quickly and effectively, from tight corners to large spaces. For everything that needs to be cleaned, whether fine, medium or coarse. For cleanliness and tidiness.

Page 8

2 Wet cleaning

Daily cleaning for maintaining hygiene. Or quick elimination of stubborn dirt or oil due to risks of slipping. For safety and upkeep.

Page 10

3 Office cleaning

Classic cleaning of offices and sanitary rooms. For the clean separation of “black” and “white” rooms.

Page 12

4 Outdoor cleaning

Clean away dirt from access roads, loading zones, parking areas and other outdoor areas. For cleanliness and a good appearance.

Page 13

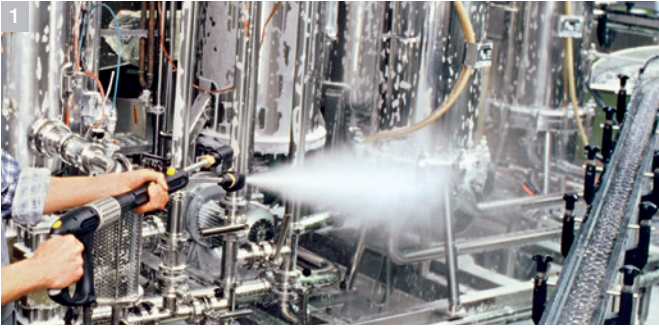

Perfect cleanliness calls for clean solutions.

Food production is subject to strict hygiene regulations, both for the actual production area as well as for areas both upstream and downstream. New or stricter standards such as HACCP and the standards ISO and IFS mean increased demands on machines and overall solutions. The Kärcher system of machines, accessories and cleaning agents developed and produced in-house covers all applications in wet and dry cleaning for every type of dirt.

Kärcher develops machines and systems for all-purpose use as well as specific complete solutions. Only those who solve the problems of their customers can be considered innovative. On floors, walls and ceilings as well as machines, tools, and vehicles. In “black” and “white” areas. For protecting employees and machines from all types of dirt. For increased working safety by reducing the risk of slipping. And without having to interrupt operations.

Progress has many faces. Those of over 600 employees in Kärcher research and development. Progress encompasses numerous factors: high performance, reliability, environmental friendliness, economic efficiency and service. Progress has numerous forms, e.g. industrial sweepers, scrubbing machines, ice blasters, high-pressure cleaners, foam lances, hard-surface cleaners. Progress in cleaning technology has one name above all: Kärcher.

1 Wet cleaning with foam

The Inno-Foam set is especially well suited for use in food production in order to clean e.g. filling systems quickly and efficiently.

2 Dry cleaning with explosion protection

Cleanliness and safety are in many cases inseparable, especially when it comes to food particles. As well as stationary explosion-protected vacuuming systems, Kärcher provides mobile industrial vacuums certified in accordance with Ex-RL 94/9 EG for all dust classes of zone 22.

3 Dry cleaning with options

Kärcher's powerful system provides an extensive selection of accessories for dry dust and dirt removal. This opens up diverse opportunities for practical applications that save time and money.

4 Wet cleaning for safety

It essentially makes no difference whether one slips on an oil spot or a soapy floor. Both risks can be reliably prevented with the Kärcher system, e.g. using a hard surface cleaner with vacuuming and the appropriate cleaning agents.

Original Kärcher accessories and spare parts

Original Kärcher cleaning agents

Quality with safety

No compromise in quality and safety. Only original Kärcher spare parts ensure reliable functioning with maximum safety and professional cleaning results. And only Kärcher cleaning agents are specially developed for Kärcher cleaning machines – for the best possible cleaning results. The Kärcher System for optimal performance with the optimal efficiency.

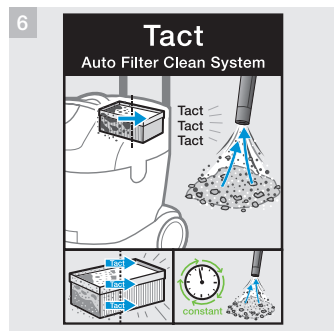

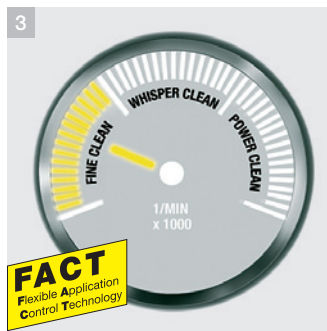

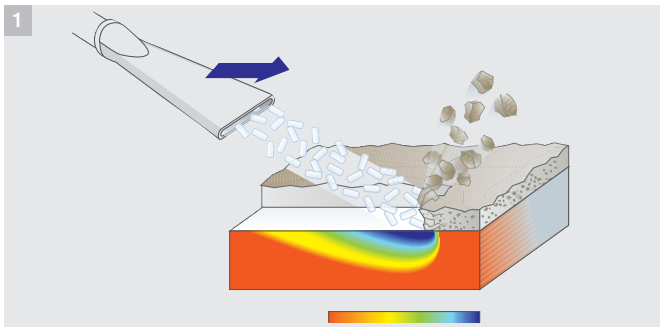

Kärcher is the partner that makes you stronger.

The future remains what it always has been: the challenge of doing things better. Regardless of how good the present is. For companies with a high need for cleaning this means fulfilling even higher standards and being able to work even more efficiently. With even higher performance, less consumption, an even longer service life and improved environmental protection.

Industrial companies require a partner to provide the right equipment, one that already has answers to questions that have not yet even been asked. A strong partner like Kärcher. Innovative, future-oriented and service-oriented. And the Kärcher System with certification and cleaning agent listing. With e.g. the progressive Easy-Foam system Kärcher provides the standard solution for the economic production of cleaning and disinfection foams that adhere for long periods of time. They can be used with all cold water and hot water high-pressure cleaners.

The Ice Blaster is proof that it is never wrong to try a completely new path. This process achieves perfect cleaning results even where other forms of cleaning would cause more harm than good. Most innovations originate wherever there is the most need for them. Just like Tact, DOSE, FACT and the microfibre roller. These technologies are, like every Kärcher machine, accessory and cleaning agent, the result of continuous development, testing and quality assurance.

1 Cleanliness = cold x acceleration

The Ice Blaster accelerates the dry ice pellets, which are up to 3 mm in size, to over 150 m/s (= 540 km/h) using compressed air. Due to this speed and the cold temperature of -79 °C, the dirt freezes and cracks form in it. The pellets penetrate the cracks, burst and remove the dirt and corrosion. An especially effective method for cleaning away almost any type of dirt while conserving the material to which it adheres.

2 eco|efficiency – achieve more with efficiency

Efficiency comes in different dimensions: Reduced energy consumption. High-performance internal-combustion engines. Lower cleaning agent consumption. Highly concentrated cleaning agents to avoid packaging. Designed for recycling or minimisation of components. Effects which can only be achieved through new ideas and innovative technologies and which, above all, require the will and ability to actually carry them out. Kärcher offers a comprehensive range of machines featuring the eco|efficiency mode as well as cleaning agents for effective, efficient and eco-friendly cleaning.

3 FACT – Flexible Application Control Technology

FACT is a Kärcher innovation in roller technology for scrubbing machines enabling the right roller speed to be used for each task. The roller speed can be set to three levels for every cleaning job:

- Power-Clean level for cleaning away the most stubborn dirt
- Whisper-Clean level for normal dirt with reduced noise level and energy consumption
- Fine-Clean level for eliminating grey film on fine stoneware tiles

4 A fine idea: microfibre rollers

The microfibre rollers with scrubbing machines marks a quantum leap in the cleaning of hard surfaces. This invention by Kärcher brings the advantages of highly friction-safe microfibre rollers to the field of professional cleaning for the first time: tremendous bonding capacity for dirt, grease and water combined with robustness and problem-free cleaning.

5 DOSE – the intelligent cleaning agent dosage

DOSE technology for scrubbing machines makes possible the precise dosage of the cleaning agent using a regulator. And switching to other cleaning agents without emptying the tank – even while driving. This saves cleaning agents and time. Germ formation is prevented since the cleaning agents and fresh water supply are separate.

6 Tact – Triggered Air draft Cleaning Technology

The vacuum cleaner filter that cleans itself with targeted, powerful blasts of air. And this process is triggered fully automatically, which brings with it numerous unique advantages. Constant high suction power – even during the cleaning process. Constant high air stream. No interruptions to work for cleaning or changing the filter. Longer service life of the filter. Lower maintenance costs.

Certified system for dry cleaning.

Production systems for dry products require above all dry cleaning processes for floors and walls, containers and installations. Dusts are not only a hygienic or health problem, but they can also be explosive. Investments in high-quality cleaning units are above all investments in maintaining value, safety and efficiency.

IV 60/24-2 W
Industrial vacuums with anti-static equipment, stable wheels and guide rolls. Operation with one or both motors.

NT 80/1 B1 M
In accordance with Ex-RL 94/9 EG certified wet/dry vacuums with stainless steel container and double steering rollers (brake, oil-resistant).

KM 75/40 W
Manoeuvrable sweeper with traction drive and sweepings container that can be rolled. Change the brush roller without tools, bulk waste flap to reduce stoppages.

IB 7/40
Dry ice cleaner for removing stubborn dirt and corrosion. Ideal for sensitive surfaces. Compact and easy to use.

1 Quick vacuuming

In filling areas or during the handling of goods there are always messes caused by spilled goods that need to be cleaned up immediately. Kärcher industrial vacuums are perfect for this due to their practical vacuuming capacities and high-performance filter technology.

2 An ice-cold professional that cleans gently

The Ice Blaster cleans filling and mixing systems, production lines and handling systems as well as tanks and ovens from stubborn residues such as grease, starches, crustifications or coking. With no chemistry or water.

3 Cleaning in the hot phase

Ovens must be vacuumed out regularly. With special Kärcher accessories made of heat-resistant materials, from the suction nozzle to the filter fleece, the oven does not even need to cool down first.

4 Vacuuming – according to your needs

With the right equipment every cleaning task can be quickly and flawlessly solved. For this purpose the Kärcher System provides numerous accessories such as suction nozzles, hoses and filter inserts – for every individual need.

Certified system for wet cleaning.

All areas in which animal or plant oils and fats are worked with (especially meat) have the strictest requirements when it comes to hygiene and safety. The Kärcher System is perfectly set up to meet them. Especially with effective cleaning agents. There is also the DOSE system for optimal dosage and cost savings. Of decisive importance are the upkeep of frictionless working processes. Depending on the scale of operations, stationary high pressure systems are the systems of choice. They provide not only a central supply of water, hot water and cleaning agents but also the proper separation, treatment and disposal of cleaning agents.

HD 10/15-4 Cage F
Food-safe high-pressure cleaner with professional spray unit and advance pressure pump (max. 85 °C).

HDS 12/18-4 SX
Heated high-pressure cleaner for ultra-high performance in continuous duty: ceramic pistons, turbo blower, eco setting.

HDC, stationary
Stationary high-pressure cleaner for supply of up to 12 cleaning stations at the same time. For high economic efficiency.

B 60 W Bp Pack
Battery-operated scrubber-drier with traction drive and interchangeable cleaning heads for almost unlimited applications.

1 Hygiene for tables, floors and walls

Periodical deep cleaning as well as daily cleaning in food processing maintains hygiene, work safety and value. Stationary high-pressure cleaners, with their high economic efficiency, and special mobile units are ideal for these applications. For meat processing Kärcher provides blue food-safe high-pressure hoses with an outer layer that does not bleed colour and is resistant to animal grease. Longlife and conductive equipment for explosion-protected areas are also available.

2 Spray once – double the effect

Cleaning and disinfection with only one lance. Kärcher has everything that you need: from the Inno-Foam system and diverse foam lances to listed cleaning agents.

3 Access the narrowest corners

Dirt and germs can be found everywhere. With high pressure and hot or cold water and appropriate cleaning agents, cleanliness and hygiene can reliably be ensured everywhere.

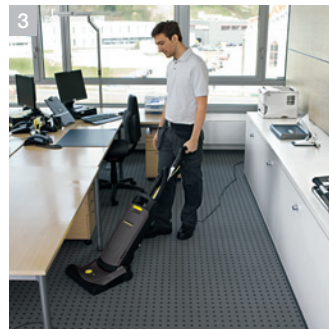

4 Apply, clean, vacuum – finished

Kärcher's hard surface cleaner achieves 10x the surface cleaning rate compared to high-pressure jets. Especially convenient due to the spray cover that prevents cross contamination. Dirt-water suction is optional.

Effective and efficient in the office.

Cleanliness and hygiene know no limits in food processing operations. Especially production-related administration rooms such as offices, computer rooms for system control and sanitary facilities are sensitive areas. Here it is important to minimise the transfer of contamination and dusts from production as well as the transfer of dirt into production areas.

1 Strong over large areas

The innovative BRC series of units combines the advantages of spray extraction with the mechanical cleaning power of brushes, making them perfect for the time-saving cleaning of large areas.

2 Dry vacuums with professional qualities

The innovative T 10/1 Professional was developed with building service providers, and it features high vacuuming power combined with the 5x filter system made of triple layered fleece filter bags, permanent main filters and motor protection filters. A HEPA filter cartridge can be retrofitted.

3 Removes even the deepest carpet dirt

Carpeted passageways and offices require regular thorough cleaning, ideally with a Kärcher brush vacuum cleaner for carpets.

4 Mobile cleaning power

Kärcher spray extraction units are suitable for all textile surfaces, floor coverings, upholstered furniture, office chairs, passenger seats. The handy, mobile, powerful and robust spray extraction units in the Puzzi series feature extensive accessories for diverse applications – even glass cleaning.

T 10/1

Powerful dry vacuum of the newest generation with a highly efficient filter system and superior ergonomics.

Puzzi 400 K

The spray extraction unit for the most demanding tasks. With integrated water supply and wastewater disposal pump.

NT 55/1 Tact

Wet and dry vac with Tact, anti-static system and automatic on / off switch for power tools.

BR 45/40

Slim walk-behind scrubber-driers with high scrubbing power and straight or curved vacuum bars.

Perfect cleaners for outdoors.

A good overall impression is important. This applies especially to the outdoor areas of companies, which are like the business card and reflect production standards. In addition there is the actual necessity of reducing dirt tracked in before entrances are reached. And keeping loading areas and driving paths clear of leaves and street dirt as well as pallet breakage and coarse dirt, both wet and dry.

1 A lot of area in a short period of time

The time-saving and economic cleaning of large areas outdoors requires high-power sweepers with low consumption, high manoeuvrability, high collection capacity and versatile accessories.

2 Hard on dirt. Easy to use

Underground car parks, transport paths, tunnels and ramps are sites for the extremely robust Kärcher scrubber driers and sweepers with impressive climbing capacity. They clean uphill and downhill.

3 Persistence in action – into every corner

Fully hydraulic Kärcher ride-on sweepers are well equipped and they can access every corner. They have the right type of drive for every use: diesel, gas or batteries.

4 Sweeping for a good image

Sweeping one's own grounds gives the right first impression. Kärcher sweepers come in all shapes and sizes to ensure the right machine for each site.

HD 9/20-4 M

Extremely mobile high-pressure cleaner with robust three-phase motor, axial pump with ceramic pistons and Easy-Press hand spray gun.

KM 75/40 W

Manoeuvrable sweeper with traction drive and sweepings container that can be rolled. Change the brush roller without tools, coarse material flap.

KM 120/150 R

Ride-on sweeper for long and dust-free working intervals with continual filter cleaning and high emptying.

MC 50

Powerful, manoeuvrable vacuum sweeper with an eco efficiency vacuum system, water circulation system and articulated steering.

A system is defined by the perfect combination of performance and function.

Kärcher Service – our promise of trust.

If the word service is a promise and not a slip of the tongue, then trust is the basis. Because you must be able have trust in the fact that your professional cleaning machines work when you need them. Every day. Every night. Everywhere. It is our job to ensure this. And give our best to do so. Reliable cleaning machines and cleaning agents. Advanced service. Expert consultation and training. And much more. In one phrase: Kärcher service. The name that means trust. And a service that provides you with certainty. We promise.

We are there for you – wherever you need us.

Kärcher stands for top performance – not only in terms of products, but also service. As the world's largest manufacturer of cleaning machines, we are there for our customers all around the world and at more than 50,000 service and sales points. This way we ensure that you have nothing to worry about. Kärcher – your partner in all situations.

1 Planning

Kärcher advises you in detailed project planning. We calculate precisely what resources you will need and what machines and equipment are ideal for you.

2 Hotline*

Friendly. Competent. Solution-oriented. Kärcher Hotline employees are fully knowledgeable of all of our units, accessories and cleaning agents, in order to provide you with expert advice on the telephone.

3 Service contracts

Top performance, always: with our service contracts your Kärcher units are always ready to go – due to regular inspections, maintenance or complete service packages.

4 Application consultation

Our application consultation ensures that you always work with the most efficient solution. Area, personnel and time frames are decisive in determining the optimal equipment for your needs.

5 Worldwide presence

Personal service is guaranteed by Kärcher. With our worldwide service and sales network you always have an expert partner nearby. For all service, consultation or sales questions.

6 Technical training

Get the most out of Kärcher. With our on-site technical training we help your employees to clean everything as effectively as possible with innovative Kärcher units.

7 We come to you

With our service management system we save time and money, and we can get to you in the quickest way possible. Regularly as part of full service. And always when we are needed.

8 Warranty extensions

Guaranteed durability: insure your business and Kärcher units optimally – with our warranty extensions or machine breakdown insurance.

9 Leasing

Stay liquid and ensure your capacity. With low leasing rates instead of large investments. Also with a maintenance contract, if you wish.

10 Rental machines

Stay as flexible as the market – with Kärcher rental machines you have what you need when you really need it. Talk to us about the possibilities.

11 Used machines

Units in top condition – with the best conditions. It does not always make sense to purchase a new unit. In these cases the Kärcher used machine guarantee is the cost-effective alternative for your project planning.

Enthusiasm. Innovation. Success.

Since its beginnings more than 75 years ago, as a value-oriented family business, Kärcher has become a world brand with three strong attributes: top performance, innovation and quality. Today, the Kärcher brand enjoys the reputation of being a global leader and resource-conserving supplier of professional cleaning systems and is synonymous with reliable products, optimal user value and ongoing commitment to the environment, culture and sport.

1 Seattle's highest building: the Space Needle
A Kärcher team pressure-washed the structure up to a height of 184 m. The job took eight weeks, working only at night.

2 A facelift for the heads of state
Clean again: In 2005 Kärcher cleaned the National Memorial on Mount Rushmore.

3 Innovative right from the start
In 1950, Kärcher developed the first hot water high-pressure cleaner in Europe for professional cleaning.

4 Clean environment
Kärcher works on environmental protection every day, with new products, technologies and investments in production facilities.

5 In-house research and development
Kärcher develops high-performance cleaning devices, accessories and special cleaning and care products.

6 Internationally represented
We are there for our customers all around the world.

7 Commitment to sports
Clean performance on the pitch. For several years, Kärcher has supported German and international football as a partner.

We are there, worldwide.
