

**KÄRCHER**

makes a difference

# BECAUSE YOUR TIME IS VALUABLE.

Before Kärcher Fleet, you had little insight to the condition of your equipment. Without checking the hour meter on the display, you had no idea how much it was actually being used. Without walking through the facility, you did not know where it was even located. To determine any of these specifics, you had to leave your desk, find the machine and verify these things on your own.

Managing your assets with Kärcher Fleet provides all your machine information at your fingertips at any time. From your office, home, or any location with an internet accessible device, you will know how many machines you own, where each machine is located, the condition of each machine, and exactly how much it is being used daily to perform the required cleaning tasks. Instead of traveling from site to site, simply check on your equipment when it is convenient for you, all in only a few minutes.

With Kärcher Fleet you can reduce the amount of time you worry about your assets, and you can spend that time focusing on the management of your employees and optimizing your business.

## KÄRCHER FLEET

Improve productivity through better asset management

PROFESSIONAL | KÄRCHER FLEET

## THE FUTURE IS CONNECTED.

The latest generation of Kärcher equipment now comes furnished from the factory with a telematics control unit (TCU). Older Kärcher and third-party equipment can be retrofitted easily as well.

The TCU records both machine data and GPS positioning information, and transfers the data via a cellular data network to a cloud based server. As a valued Kärcher equipment owner, you have the opportunity to access your segregated data via a web portal using any internet ready device. Future machine pur-

chases, or those added to the network through our retrofit service, are assigned directly to your account. Kärcher Fleet is your entry into digital cleaning, providing a vast array of information at your fingertips.

The TCU is fitted in-factory for the following cleaning machines: B40, B60, B80, & B 120 walk-behind scrubbers, B 150 ride-on scrubber, Chariot 3 iScrub, Chariot 3 iExtract and Chariot 3iVac stand-on machines

# KNOWLEDGE. THE KEY TO YOUR SUCCESS.

## Have you ever wondered:

- How many machines do I own?
- Where are all of my machines located right now?
- Will I know if my machine is lost or stolen?
- Did my machines get used today as planned?
- Are all of my machines working properly?

Asset management with Kärcher Fleet answers all of these questions and more.

Kärcher Fleet provides:

- One location to track all of your machines
- Visibility into the GPS location of each of your machines
- Knowledge of the machine operating hours per day
- Monitoring of the machine health
- Asset details such as all material numbers and serial numbers
- Notifications of machine break down, movement outside of the defined GeoFence, and even when the machine doesn't meet customized usage parameters
- Ability to track total cost of ownership
- Various reporting tools with export capability

With all of this information at your fingertips, you will be able to know the work is getting done as planned, your equipment is in good working condition, when your machine has been borrowed or stolen, and most importantly, you will know all of this from anywhere at any time.

The B 40, B 60, B 80, B 120 and B 150 scrubber, along with the complete Chariot 3 machine family are fitted with a TCU from the factory. Other Kärcher and third-party equipment can be retrofitted to provide the basic Fleet information. You can choose between the free service, Freemium, or upgrade to Premium, to have unlimited access to all functionality.

	Freemium	Premium
<b>Overview list of all machines</b>	Full	Full
<b>Machine status</b>	Full	Full
<b>Service alarm</b>	Full	Full
<b>Managing machine costs</b>	Full	Full
<b>Location</b> (Frequency with which data is updated)	Limited	Full
<b>Battery status</b> (Frequency with which data is updated)	Limited	Full
<b>Reports</b> (Frequency with which data is updated)	Limited	Full

**Freemium:** The basic service offers you many benefits. You see your machines, neatly arranged in a list, giving you a clear overview at all times of their status. You have unlimited access to the Total Cost of Ownership area for each machine, allowing you to track the costs of your equipment, repairs, consumables, or any other costs. Machine Service can be requested directly while in the web portal. Freemium is free for all equipment, and it will remain this way. You can upgrade to Premium at any time, but are not obligated to do so. Upgrading is easy - simply select the equipment you want to upgrade directly in the Kärcher Fleet Portal.

**Premium:** The upgrade to Premium offers you unlimited use of all reports, and unlimited access to all functions relating to location, machine usage and the current status of your machine. Your sales representative is available to answer any questions you have on the many valuable features Premium has to offer.
