

KÄRCHER

makes a difference

MAKE YOUR TASK EASIER.

The scrubber drier BD 38/12 C Bp

1 Reliable disc technology

Very good cleaning effect on smooth floor coverings. Suitable for use with brushes and pads. Brush included in scope of delivery

2 Faster, longer, lighter

The brand new high-performance battery for the BD 38/12 C Bp is extremely light. The resulting low weight of the machine noticeably improves handling and mobility, especially on staircases. The quick charging times (50% = 1 h, 100% = 3 h), the ability to partially charge the battery without losing capacity and a life span that is three times longer (in comparison to conventional batteries) help you to carry out your work efficiently and safeguard your investment in the machine.

3 Luxurious operating comfort

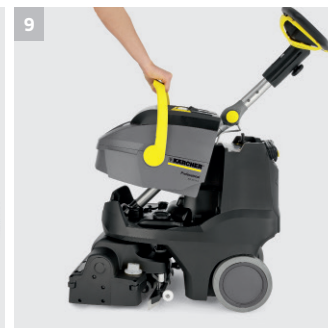

The steering wheel of the new BD 38/12 C Bp does not only provide a completely new driving experience; it also serves as the central information hub. It houses the main operating controls and displays for the brushes, suction, ecoefficiency mode and fresh water switches. Ergonomic and clear design. The water quantity adjustment is also easy to access.

4 It is great when things are easy!

Equipment storage space is always tight. The steering column of the BD 38/12 C Bp folds up quickly and easily, opening up some completely new possibilities, like transportation by vehicle.

5 Efficiency, the next level

The unique Kärcher ecoefficiency mode is a milestone on the path towards sustainability: it utilises energy and resources intelligently. Power is no longer needed in stand-by mode, reducing CO₂ emissions. Water consumption is reduced, producing less waste water. At the same time, the run time is extended, the noise level is reduced and significant time is saved.

7 Quality, piece by piece

Good ideas deserve high-quality implementation. The high-quality workmanship of the BD 38/12 C Bp is apparent from the first glance. Each individual part is stress tested, as is the fully-assembled device. We also ensure that it operates quietly.

8 Colour trends for safe operation

Yellow panels mean daily maintenance. Grey panels highlight service points. The standardised Kärcher colour coding eliminates any confusion and possible oversights.

9 Quick disposal

The dirty water tank of the BD 38/12 C Bp is easy to detach and can be emptied in practically any available drain.

You have to experience it yourself.

The same is true of cars: a unique driving experience can only be assessed from behind the wheel. Nothing is more conclusive than being in the driver's seat. Time to take the new BR 38/12 C Bp for a test ride. Now available from your local Kärcher dealer.

Technical data

Brush working width	mm	350
Vacuum working width	mm	450
Area performance	m ² /h	1,400
