

KM 85/50 W Bat 34" Walk Behind Sweeper with Dust Control

KM 85/50 W Walk Behind Sweeper

Robustly made, easy to handle.

The KM 85/50 battery model was designed to yield ride-on productivity at a walk-behind size and price. Capable of sweeping up to 100,000 square feet of surface per battery charge, this machine is perfect for facilities where there is a mixture of congested and wide open areas. Can be used indoors or outdoors. Easy to understand controls including a litter-gate for retrieving large pieces of litter such as pop cans and discarded coffee cups. A KM 85/50 is an ideal choice for locations where a ride-on sweeper is too large, but available walk-behind choices too small.

Model	Order #
KM 85/50 W Bat 30" sweeper. Standard battery pack	9.512-497.0

Technical Data	
Cleaning width	34"
