A HYGIENIC CLEANING SOLUTION

The convenient commercial-duty steam cleaner.

SG 4/4 STEAM CLEANER

Hygienically clean without the use of chemicals.

Time is money – particularly in commercial cleaning. The SG 4/4 equipment has an ingenious filling system for convenience, making it ideal for commercial use.

1 Two-tank system

- The fresh water tank can be continually filled, as the boiler and tank are separate.
- Because only part of the overall volume is heated at any one time, it takes very little time for a consistent steam pattern to form.
- With a total volume of over 4.2 quarts (4 litres), the SG 4/4 can be used for long periods without refilling.

2 VapoHydro

- Thanks to VapoHydro, the steam level can be adjusted to the cleaning task.
- In addition to the steam pressure, the saturation can be adjusted from full steam to hot water.
- With the hot water jet, even stubborn dirt can be effectively dissolved from the start.

3 Accessory storage compartment

- The integrated storage compartment enables the storage of a variety of accessories.
- Special small parts are always safely stored and do not get lost.
- Even the tubes can be stored on the rear of the unit.

4 Hygienic cleaning

- Hygienic cleaning without the use of chemical substances.
- The avoidance of aggressive cleaning agents; protects the operator and the surfaces treated.
- Only water is used for cleaning – easy both on the user's health and wallet.
