### OPTIMISED ACCESSORIES AND FEATURES

**Removable handle**  
The ergonomic handle can be easily removed from the suction hose in order to attach other accessories such as brushes. Perfect for working in confined spaces (e.g. in cars).

**Convenient filter removal**  
Patented innovative technology for quick and convenient filter removal and emptying without contact with dirt.

**Extremely durable**  
Robust, long-lasting plastic hose.

### IMPROVED DESIGN - SUCTION POWER HUGELY INCREASED

**Optimal air flow**  
The highly flexible suction hose comes with a wider opening to avoid blockages while vacuuming. Flow resistance is significantly reduced by the improved hose geometry.

**More efficient motors**  
Our vacuum cleaners have been made significantly more efficient thanks to their improved motor design. This means that they provide more powerful suction whilst at the same time consuming less energy.

**Airtight**  
Better-quality seals between the container and the vacuum head, together with an improved connection between the hose and the container, ensure that the vacuum is airtight. This prevents unwanted air from being drawn into the vacuum cleaner, keeping the power inside the device. The result? Outstanding suction power.

**Optimal dirt pick-up**  
Use the switches to adjust the nozzle to suit your vacuuming needs (dry or wet vacuuming). There are also two integrated brush strips or squeegees adapted to different cleaning tasks.

**Less effort**  
Lateral rollers guaranteeing smooth and effortless movement.
