Vacuum Cleaner with Water Filter

The multi-stage filter system (water filter & HEPA 12) of DS 5.800 ensures that even microscopic dirt particles as small as 0.3 µm are extracted. This is ideal for families with young children or people with allergies. The DS 5.800 relies on the natural power of water being swirled around at high speed. The dirt is piped through the swirling water, reliably filtered from the air, and bound in the water. The result: exceptionally fresh, 99.9% clean exhaust air.

Sistem penyaringan berjenjang (penyaringan air dan HEPA 12) dari DS 5.800 menjamin bahkan partikel debu sekecil 0.3 mikrometer tersaring. Alat ini ideal untuk keluarga dengan anak-anak atau mereka yang memiliki alergi. DS 5.800 mengandalkan kekuatan alami air yang dilingkarkan dengan kecepatan tinggi. Kotoran disalurkan melalui air yang berputar, tersaring dari udara dan terperangkap di air. Hasilnya: udara buangan yang sangat bersih (99.9%).

Steam Cleaner

Steam cleaning is suitable for any home, whether for singles, small or large families. Microscopic steam particles penetrate even the smallest pores. In this way they dissolve stubborn dirt and prevent bacterial and microbial growth. Since cleaning with steam does not involve the use of cleaning agents, no allergenic residues can form on cleaned surfaces. Kärcher steam cleaners are extremely versatile and clean without chemicals.

Membersihkan dengan uap panas cocok dipakai di rumah, baik keluarga kecil maupun besar. Penetrasi partikel uap panasnya mencapai hingga ke pori-pori terkecil. Dengan demikian dapat menghilangkan kotoran membandel serta mencegah berkembang biaknya bakteri dan mikroba. Karena tidak menggunakan cairan kimia, pembersih uap panas ini tidak meninggalkan residu pada permukaan. Pembersih uap panas dari Kärcher sangat serbaguna dan membersihkan tanpa menggunakan bahan kimia.
